ANDRES RODRIGUEZ

FRONTEND DEVELOPER

ABOUT ME

I am Andrés Rodríguez Leitón, a passionate frontend developer with self-taught experience in the world of programming. Since I began my career, I have constantly sought ways to improve and learn new technologies. I consider myself an innovative person with a great capacity to solve complex problems. I love working efficiently both in a team and independently, always striving to achieve proposed goals and promote a collaborative and respectful environment.

Thank you for your time!

PROFESSIONAL EXPERIENCE

2025-

Feb-

current

Solutions Engineer at Pockyt (USA)

Supporting international customers with technical issues related to the integration of various Pockyt APIs, ensuring successful implementations in the shortest time possible. Additionally, responsible for creating and maintaining technical documentation on APIs and processes using tools such as ReadMe.com, Confluence, Jira, and HubSpot.

2024-

Jul

2025-

Feb

Frontend developer at Gwocu systems (USA)

Maintenance and development of new features for the company's software, ensuring system optimization through code refactoring and the implementation of cutting-edge technologies. Tasks also include collaborating with cross-functional teams, troubleshooting technical issues, conducting software testing to guarantee quality, and creating technical documentation.

2024-

April

Frontend developer at Yadira Mayac S.A.S

An informative single-page application for a Colombian company with admin roles, login functionality, and features for uploading and downloading documents, along with a responsive adaptive design.
